Thanks for the information. I have some results back from the air sampling that we did both onsite and in the residential area. I just sent it to Sharon Reese. Do you need this information as well.

Thanks

Hazmat only was out there the friday 8-3-14 on the evening of the original spill. They did air monitoring and pH readings for me. I took the water samples that they keep saying the fire dept took on the news. They notify me if they respond there but I double checked with the hazmat chief just to be sure. Neighbors are continuing to raise cane through the media about the facility.

Steve/Sharon

I heard that there was a rally at the site on sunday and that Houston Haz Mat may have taken some water samples. Do you have any info on this or a contact person.
